EXPERIENCE

Automation Engineer

August 2022 - Present

Capgemini Ireland

At Capgemini my duties include but are not limited to the following:

- Create test cases and execute them to confirm the safety of code modifications.
- Develop and execute regression, acceptance, negative and end-to-end tests.
- Work together with cross-functional teams to implement the optimal quality plan.
- Actively participating in all ceremonies for Agile Scrum (Sprint Planning, Daily Stand Up, Sprint Refinement, Sprint Retrospective).
- Integrate framework with Git and Jira.
- Run Bamboo job.
- Generate Allure Report.
- API testing using Postman and Rest-Assured.
- Build automation framework for software testing.

Quality Assurance Engineer

October 2019 - August 2022

Zenith Bank Plc

Zenith Bank is a leading multinational financial service provider that prides itself in its secure and user-friendly mobile and web digital solutions.

At Zenith Bank, my duties include but are not limited to the following:

- Actively involved in all Agile Scrum ceremonies (Sprint Planning, Stand Up, Sprint Refinement, Sprint Retrospective).
- Defined, wrote, and maintained comprehensive product test strategies.
- Assisted in the development of test methods and test data.
- Created and run acceptance, regression, and end-to-end tests.
- Worked closely with product owners and developers to provide input into automation deliverables.
- Collaborated with cross-functional teams to put the best quality plan in place.
- Acted as a customer advocate and conducted tests from the standpoint of the end user.
- Built automation framework for software testing.
- Took ownership of my code to be qualitatively high and supported colleagues in code review.
- Worked across the entire product life cycle: concept, design, development, deployment, testing, release, support.

EXPERIENCE

Test Analyst

Jan 2016 - Oct 2019

Zenith Bank Plc

Zenith Bank is a leading multinational financial service provider that prides itself in its secure, and user-friendly mobile and web digital solutions.

My roles and responsibilities include but are not limited to the following:

- Provided design and functionality feedback.
- Wrote Test cases and ran to ensure that code changes were safe.
- Customers' production edge cases were replicated and assessed.
- Transferred information to others in order to improve the team's overall capabilities.
- Provided regular status against test plans.
- Built test methodology and test data set-up for configurations, business, and transactional processing, web services, and reporting.
- Collaborated with Product owners and developers on design and testing results.
- Diagnosed problems, and reported bugs and enhancements to development.
- Determined which functional areas may be impacted by the new change.
